Rugged Commercial Off the Shelf Electronics (COTS)

CRI offers both standard products and custom designs to meet customers most demanding environmental requirements

Various configurations of CRI standard displays have been designed to meet and independently tested to the following specifications:

- Mil-S-810F (selected procedures - shock, vibration, sand and dust, pressure altitude, thermal, humidity, fungus)
- Mil-S-901D Grade A and Grade B Shock
- Mil-S-1474 Noise Limits
- Mil-S-167 Vibration
- Mil-S-461 for conducted and radiated emissions and susceptibility
